

# **Advantages of BCC Migration Engine**

A Balli	Security is maintained
Security	<ul> <li>No human access to mail data</li> </ul>
	<ul> <li>No temporary storage of mail data during the migration</li> </ul>
1911 120 1 1 1 1 1 1 1 1 1	<ul> <li>No client migration farm with technical user</li> </ul>
	accounts are required
	<ul> <li>Seamless migration of encrypted mails / calendar entries</li> </ul>
	<ul> <li>Option to re-encrypt data in target system with S/MIME</li> </ul>
	certificates
Speed	<ul> <li>Faster migration cut over</li> </ul>
Speed	• Migration can start with small subset of mails
	(for example last 2 weeks)
	Migration can continue after cut over
	High Performance
	• Automated 24/7 migration and sync mechanism
	Scalability by adding additional Migration Engines either on
	premises or in the cloud
Flexibility	Policy based migration settings to comply with specific
Γιεχισιιιτγ	requirements for user groups (VIP, Marketing, Sales etc.)
	Continuous migration procedure can start weeks before, with no
	user intervention needed
	Elimination of performance bottle necks during the whole
	migration procedure
	Customisable self-service portal enables internal IT staff to
	manage the migration for their users or gives users the ability to
	have their data 'migrated on demand'
Post Migration	• Migrate 100% of mail
	Migrate subset to production Microsoft Office 365 mail box
	<ul> <li>Migrate the rest to Exchange Online Archive</li> </ul>
	• Complete migration allows for Domino server shutdown
	<ul> <li>Mail Migration Engine for future M&amp;A or Spin-offs</li> </ul>
	<ul> <li>Microsoft Office 365 tenants to Microsoft Office 365</li> </ul>
	• Exchange to Microsoft Office 365
	<ul> <li>HCL Domino to Microsoft Office 365</li> </ul>

Server based, automated high secure and high-speed migration of mails, calendar, tasks and contacts from HCL Domino to Microsoft Exchange/Office 365.

# BCC Mail Migration Engine provides extremely fast, high secure and reliable mail migration from HCL Domino to Microsoft Exchange or Office365.

Furthermore, BCC tools can also automate the provisioning of users and exchange mailboxes within Exchange on prem or Office 365 without any user impact.

BCC's automated migration execution allows a faster project delivery and requires less professional services effort which reduces project duration and service costs. Automated migration goes side by side with high secure and GDPR compliant mail content migration to ensure that your confidential mail data is not at risk at any time during the whole migration.

Profiles identifying message and calendar selection as well as scheduled migration time can be applied to different user groups.

#### Server Based Architecture

BCC Mail Migration engine runs natively on a HCL Domino server which provides significant advantages compared to other products

- automated high-performance 64-bit multi-threaded migration
- $\bigcirc$  no expensive client migration farms are required
- automated 24h/7-day migration procedure

**HCL Domino** 

#### **High Security**

- Migration jobs are executed using the Domino Server ID and multiple Office 365 impersonation accounts
- no "uncontrolled" technical user IDs are used to access sensitive mail data during migration
- no access to migrated mail content required during migration process
- GDPR Compliant

### HCL Domino

## E 🛛 Exchange

Office 365

### Policy based migration

- Define migration target system
- Active Exchange mail box
- On Premises Exchange Archive
- Office 365 tenant
- Office 365 Mail Archive
- All migration configuration settings can be stored in migration profiles
- Time range for migrating emails: As an example, migrate all mails created since 1.1.2015 or the last 2 years
- $\odot$  Include and/or exclude attachments by size or type
- Advanced selection rules to include and/or exclude mails by sender and/or recipients
- Flexible assignment of policies for groups such as VIP, Marketing, Sales etc.

### BCC Workflow Engine

The migration process can be wrapped with pre and post jobs. These jobs execute tasks to automate other elements of the migration. Possible actions could be:

- $\odot$  Sending Emails to migrated users or the migration team
- Executing PowerShell scripts, batch files, other migration tasks, etc.

### **Extensive Reporting**

- O Detailed logging and reporting of migration events
- Statistics and reports are easy to understand
- Optional Power BI based reporting

BCC Unternehmensberatung GmbH Frankfurter Str. 80-82, 65760 Eschborn, Germany +49 (0)6196 64040 o, sales@bcc.biz, www.bcc.de

### BCC's unique features

- Transparent and fully automated process for transferring local databases, mail files or calendar entries without user interaction.
- Direct execution on the HCL Domino server does not require extensive migration workstations (migration farms).
- No access to sensitive data by technical user ID or technical personnel during the migration.
- The entire migration process is comprehensively logged and provided in the form of reports. The logging of the migration process can be provided directly in an Excel sheet.
